8. DONE!

ZK Vertriebs GmbH . Königshofstraße 45 . 6800 Feldkirch . Austria

CARE INSTRUCTIONS

for ZK Universal PV Metal Tiles

Dear Customer,

We sincerely thank you for purchasing our high-quality ZK Universal PV Metal Tiles. This user manual contains important information for the proper use and maintenance of our products, enabling you to maximize their performance and lifespan.

PRODUCT OVERVIEW:

Our product range comprises two different models - ZK Small and ZK Large. All our sheet tiles are made of high-quality galvanized sheet metal and come equipped with a lead apron.

QUALITY ASSURANCE:

We would like to emphasize that all our materials undergo careful inspection and production to adhere to the highest quality standards. Our products meet all necessary norms and requirements to ensure reliable performance and durability.

MEASURES FOR RUST PREVENTION:

To maximize the lifespan of your ZK Universal PV Metal Tiles, please consider the following rust prevention measures:

- **Do not leave chips on the sheet:** It is important to ensure that no metal chips or foreign objects remain on the surface of the sheet tiles. These can cause scratches and damage the protective layer.
- **Use seals for the screws:** When installing the sheet tiles, it is crucial to use seals or washers for the screws used. This prevents moisture from getting under the tiles and promotes rust formation.

Please note that there is no warranty for the appearance of our products, as external influences such as weather and environmental factors can affect the appearance over time. However, this does not impact the performance of your ZK Universal PV Metal Tiles. In the event that the user manual is not followed, damages cannot be ruled out, and in such cases, no warranty can be provided.

If you have any further questions or need assistance, we are at your disposal.
